## Phelps Co. R-III School District

October 24, 2017

Re: Private/Parochial/Homeschool Consultation Meeting

The individuals with Disabilities Education Act (IDEA) requires the public school district to inform private schools about their access to special education and related services available to eligible students.

Private/Parochial/Homeschooled students are entitled to special education services from local public school district, regardless of district residence, based on a plan of services.

A meeting has been scheduled to consult with representatives of these students to conduct a census of students with disabilities, gain input about need for services and to develop a plan for services based on available funding.

I hope you will be able to attend the meeting scheduled for 3:30 on Tuesday, October 24, 2017 at Phelps Co. R-III School cafeteria. Your input is important to us in being able to better serve the students in our district.

Please contact us if you have questions, or if you have information concerning students in need of our services.

Sincerely,

Monica Hagen
