- March 23: [No School--Parent Teacher Conference](#)
- March 26 - March 30: [No School--Spring Break](#)
- April 02: [School Resumes](#)

This Week's Focus

6th Grade* This week we will be beginning our new chapter The Earth and the solar system. This should be a great time to do this chapter, as it is always fun to learn about the solar system. We will also be finishing up our projects at school about recycling.

7th Grade* This week we will be continuing chapter on Energy and Energy Resources. Make sure at home you begin collecting "trash" items to build our next project, a wind powered car. This project has to be built at school but supplies have to be brought from home. **Bring in supplies by Wednesday.**

8th Grade* This week we will be focusing on MAP test review as it will begin the first few days we are back from Spring break. This test is over 6th-8th grade science so there is much review that needs done. ☺

Exp. Science*

6th and 7th: This week we will be focusing on temperature conversions and our March STEM challenges.

8th: This week we will continue our weekly MAP Prep items and STEM challenges.
